Open to Relocate | Authorized to work in the U.S. under OPT | STEM OPT Eligible (up to 3 years, no sponsorship required)

WORK EXPERIENCE

Data Analyst | Mindset2Money, Generation Wealth Conference | Chicago, IL Jun 2026 - Present

- Built a registration data system in Excel using VLOOKUP/XLOOKUP and Pivot Tables for an event with no existing tracking. Leadership gained real-time visibility into event performance.
- Built an automated speaker and marketing tracker in Excel using Power Query, Pivot Tables, and VLOOKUP/XLOOKUP, replacing a manual copy-paste process.
- Catch and fix data mismatches weekly using VLOOKUP to cross-check two systems, coordinating fixes with the team over Slack.

Business Development & Analytics Intern | Wakanaka Business Solutions | Zambia Jun 2026 - Jul 2026

- Built a KPI dashboard in Excel using VLOOKUP, tracking 18 metrics across three business areas with no prior systematic tracking. The team uses it to guide strategy.
- Built a scoring system in Excel that rates candidates across 3 dimensions: accountability, precision, and professional etiquette, tracked in ClickUp. It replaced an inconsistent, subjective process.
- Helped the team target the best leads first, by organizing sales contact data by industry across 41+ active records in Apollo.

Business Analytics & Strategy Intern | Global Stratos | Raleigh, NC Sep 2025 - Feb 2026

- Combined 9 scattered data sources into one KPI framework using VLOOKUP and Pivot Tables in Excel. Buyers, governments, and finance institutions could finally see the same numbers.
- Wrote requirements and business case for a new project in Asana. Leadership approved it quickly, and my system became how the team measured it.
- Rebuilt a slow, manual reporting process into an automated Tableau dashboard. This cut reporting time by 20-25%.

Business Operations Analyst | Sri Mahaganapathy Hardwares | Coimbatore, India Jan 2024 - Jul 2025

- Built a Tableau sales and finance dashboard that replaced manual reporting, reducing reporting time by approximately 30% and giving leadership real-time visibility into revenue and financial performance.
- Built a separate Tableau inventory dashboard covering 1,500-2,000 products, helping reduce stockouts and overstock by approximately 20% through better inventory tracking.
- Analyzed purchase data for 9,000+ customers using Excel and Python, identifying buying patterns that improved inventory and discount decisions by approximately 15%.

SKILLS

Tools: Excel, SQL, Python, R, Power BI, Tableau, Power Query, ClickUp, Asana, Slack

Concepts: Dashboard Development, Data Cleaning & Validation, Data Reconciliation, KPI Development, Predictive & Statistical Analysis, Trend Identification, ETL/Data Pipelines, Requirements Gathering

Soft Skills: Stakeholder Reporting, Cross-Functional Collaboration, Business Intelligence, Communication

PROJECTS

Applicant Withdrawal Prediction, Teach for America - R, Machine Learning

- Built a predictive model in R to flag at-risk applicants, tested against 10+ methods and a severe data imbalance problem. It is now in active use on 74,000+ records.

Vendor Intelligence Dashboard - Power BI, DAX

- Built a Power BI dashboard using custom DAX measures, analyzing \$52M in vendor revenue and margins across 16 vendors and 6 years of data.
